

# Field Inlet Grates

**MANNING GRATE**

**TELFORD GRATE**

## General description

The *Manning* grate, is used in areas frequented by pedestrians. The *Telford* is used in areas that are mowed, where clippings may clog *Manning* openings. Both are ductile iron. The undercut *Telford* bars are designed to limit the possibility of debris becoming wedged in the larger openings.

## AS 3996 Compliance

- Material and manufacturing quality.
- Manning, Class D load capacity.
- Telford, Class C load capacity.
- Bicycle safety
- Pedestrians – *Manning*, 17mm slots, conservatively satisfy Clause 3.3.5, Pedestrian Safety requirements.
